Annual Review of Phytopathology
Volume 23, 1985

CONTENTS

PREFATORY CHAPTER

Plant Pathology at the Crossroads, *Arthur Kelman* 1

HISTORICAL PERSPECTIVES

William Brown: Pioneer Leader in Plant Pathology, *S. D. Garrett* 13

Ernst Gäumann, 1893–1963: Pioneer Leader in Plant Pathology, *H. Kern* 19

APPRAISAL OF PLANT DISEASE

The Spatial Analysis of Soilborne Pathogens and Root Diseases, *C. Lee Campbell and James P. Noe* 129

Limiting the Effect of Disease Resistance on Yield, *V. Smedegaard-Petersen and K. Tolstrup* 475

PATHOGENS/FUNGI

The Biology, Ecology, and Control of *Sclerotium rolfsii*, *Z. K. Punja* 97

Parasite: Host: Environment Specificity in the Cereal Rusts, *L. E. Browder* 201

PATHOGENS/BACTERIA

The Molecular Genetics of Plant Pathogenic Bacteria and Their Plasmids, *Nickolas J. Panopoulos and Richard C. Peet* 381

PATHOGENS/NEMATODES

The Ecology of Nematodes in Agroecosystems, *Diana W. Freckman and Edward P. Caswell* 275

PATHOGENS/VIRUSES

Advances in Geminivirus Research, *B. D. Harrison* 55

PHYSIOLOGY OF HOST-PATHOGEN INTERACTION

Transposon Mutagenesis and Its Potential for Studying Virulence Genes in Plant Pathogens, *Dallice Mills* 297

(*Continued*)

Enzymatic Penetration of the Plant Cuticle by Fungal Pathogens, *P. E. Kolattukudy* 223

BREEDING FOR RESISTANCE

Strategies in Unconventional Breeding for Disease Resistance, *Gerhard Wenzel* 149

The Current Status and Prospects of Multiline Cultivars and Variety Mixtures for Disease Resistance, *M. S. Wolfe* 251

EPIDEMIOLOGY AND INFLUENCE OF ENVIRONMENT

The Epidemiology of Forest Nursery Diseases, *W. J. Bloomberg* 83

A Comparison of Simulation Approaches to Epidemic Modeling, *P. S. Teng* 351

ACTION OF TOXICANTS AND CHEMICAL CONTROL

The Bioregulatory Action of Flavor Compounds on Fungal Spores and Other Propagules, *Richard C. French* 173

The Chemical Control of Post-Harvest Diseases: Subtropical and Tropical Fruits, *Joseph W. Eckert and Joseph M. Ogawa* 421

BIOLOGICAL AND CULTURAL CONTROL

Trichoderma and Gliocladium: Biology, Ecology, and Potential for Biocontrol, *G. C. Papavizas* 23

SPECIAL TOPICS

Monoclonal Antibodies in Plant Disease Research, *Edward L. Halk and Solke H. De Boer* 321

On the Conceptual Basis of Crop Loss Assessment: The Threshold Theory, *J. C. Zadoks* 455

Plant Pathology in the Small Farm Context, *Raul A. Moreno* 491
